PERGAMON

Planetary and Space Science

Planetary and Space Science **publishes original articles as well as short communications (letters). Ground-based and space-borne instrumentation and laboratory simulation of solar system processes will be included. The following fields of planetary and solar system research are covered:**

- **celestial mechanics, including dynamical evolution of the solar system, gravitational captures and resonances, relativistic effects, tracking and dynamics**
- **cosmochemistry and origin, including all aspects of the formation and initial physical and chemical evolution of the solar system**
- **exobiology, including origin of life, detection of planetary ecosystems and pre-biological phenomena in the solar system and laboratory simulations**
- **history of planetary and space research**
- **outer planets and satellites, including formation and evolution, remote sensing at all wavelengths and *in situ* measurements**
- **planetary atmospheres, including formation and evolution, circulation and meteorology, boundary layers, remote sensing and laboratory simulation**
- **planetary magnetospheres and ionospheres, including origin of magnetic fields, magnetospheric plasma and radiation belts, and their interaction with the sun, the solar wind and satellites**
- **small bodies, dust and rings, including asteroids, comets and zodiacal light and their interaction with the solar radiation and the solar wind**
- **terrestrial planets and satellites, including the physics of the interiors, geology and morphology of the surfaces, tectonics, mineralogy and dating**

Authors are requested to submit papers to the Editorial Office or one of the Associate Editors.

History
Planetary and Space Science is the official organ of the European Geophysical Society Planetary and Solar System Sciences Section.

Copyright
It is a condition of publication that manuscripts submitted to this Journal have not been published and will not be simultaneously submitted or published elsewhere. By submitting a manuscript, the authors agree that the copyright for their article is transferred to the Publisher if and when the article is accepted for publication. However, assignment of copyright is not required from authors who work for organizations which do not permit such assignment. The copyright covers the exclusive rights to reproduce and distribute the article, including reprints, photographic reproductions, microform or any other reproductions of similar nature, and translations. No part of this publication may be reproduced, stored in a retrieval system or transmitted in any form or by any means, electronic, electrostatic, magnetic tape, mechanical, photocopying, recording or otherwise, without permission in writing from the copyright holder.

Photocopying information for users in the U.S.A.: The Item-fee Code for this publication indicates that authorization to photocopy items for internal or personal use is granted by the copyright holder for libraries and other users registered with the Copyright Clearance Center (CCC) Transactional Reporting Service provided the stated fee for copying, beyond that permitted by Section 107 or 108 of the United States Copyright Law, is paid. The appropriate remittance of $9.50 per copy per article is paid directly to the Copyright Clearance Center Inc., 222 Rosewood Drive, Danvers, MA 01923, U.S.A.

Permission for other use: The copyright owner's consent does not extend to copying for general distribution, for promotion, for creating new works, or for resale. Specific written permission must be obtained from the Publisher for such copying.

♾™ The paper in this publication meets the minimum requirements of the American National Standard for Information Sciences—Permanence of Paper for Printed Library Materials, ANSI Z39.48–1984.

The Item-fee Code for this publication is: 0032–0633/95 $9.50 + 0.00

Subscription information
Volume 43 (12 issues) will appear in 1995. Published monthly.

Annual Institutional Subscription Rates 1995: North, Central and South America, U.S.$1431, Rest of World, £960. Associated Personal Subscription Rates are available on request for those whose institutions are library subscribers. Sterling prices exclude VAT. Non-VAT registered customers in the European Community will be charged the appropriate VAT in addition to the price listed. Prices include postage and insurance and are subject to change without notice. Subscription enquiries from customers in North America should be sent to: Elsevier Science Inc., 660 White Plains Road, Tarrytown, NY 10591-5153, U.S.A., and for the remainder of the world to: Elsevier Science Ltd, The Boulevard, Langford Lane, Kidlington, Oxford OX5 1GB, U.K. Subscription rates for Japan are available on request.

Special prices for members of the EGS: £50.00 including carriage charges. Orders should be addressed to The European Geophysical Society (EGS), P.O. Box 49, D-37189 Katlenburg-Lindau, Germany.

Changes of address: Please allow six weeks for all changes to become effective. Second Class Postage Paid at Newark, NJ. Postmaster send address corrections to *Planetary and Space Science*, c/o Elsevier Science Inc., 660 White Plains Road, Tarrytown, NY 10591-5153, U.S.A.

Back Issues: Back issues of all previously published volumes are available direct from Elsevier Science offices (Oxford and New York). Complete volumes and single issues can be purchased for 1990–1994. Earlier issues are available in high-quality photo-duplicated copies as complete volumes only. Back volumes on microfilm are available from UMI, 300 North Zeeb Road, Ann Arbor, MI 48106, U.S.A.
